

You are in the army now

(episode 10 - (thurs-)day 1)

TT agenda

- comments of our immediate military head command, colonel Becker, head of our field (for celibates) hunters regiment 2 in (Köln)Bonn and head of our forest barracks here in Hilden on our first nine modules which covered the ...

- national dimension

- before we go on with the

- international dimension

... of our divine (dis)mission ...

Soldiers,

you were fantastic students during your basic crash course! I am very pleased to meet you and sure you are going on exactly like this in your advanced crash course after my short intermezzo today and tomorrow! I am colonel Martin Becker, similarities with fictive novel characters mere coincidence what you do not doubt if you search yellow pages for me.

ha ha ha amusement

Following your course was exiting and promising and except for a few points (•) I do have nothing to add to major Tom's views and your remarks. These additional • to be mady very clear rather address our golden stars than you. However I address them here so I do not have to rapport a closed door discussion with them here instead.

Time to valuable.

We are only going to do a short gut instinct check versus our five core values (value check) together regarding the results of our first 9 modules. 9 modules cover our five values. Do not worry we are not going to check 9 times five values ... It is going to be

exemplary. I would **wish**, how ever that you timely internalize **the (our) five core values** and that you start use to apply this value check for yourself in any case of conscience doubt!

Our core values are:

truth, freedom, justice, ផ្អែង, and (general) health (conditions).

We want none of them limited which is regarding **health** maybe not fully possible in cases of existing individual diseases. However, also, even or especially allegedly chronic unhealable and regularly deadly physical diseases/symptoms could be treated much better as they are momentarily. Generally regarding life conditions it needs to be noted by international law (n. b.:) that they have a direct influence (sneaking attack) if not even impact (full speed/ hard (&) soul attack) on individual and collective health. The attacks have on a health scale from 1 (deathbed (in your age of 44 instead of fair 70-90)) to 10 (fit as a fiddle) the average health of the german population already decreased down to an estimated absolute maximum of 5, rather less, individually as well as collectively already deep enough to be considered as total damage. We are no car we are a people and cannot be replaced by a new one but we are therapy capable. We want health on the scale collectively back at 10 and individually at 7 minimum. Our healing coup is going to bring it back up there. (And only to avoid misunderstandings we want a healthy life. No longer life.)

The other values are not limited at all since all five of them do not interfere with each other. In contrary, the other way around they condition each other even. Lies make sick.

What enemies try to codify in treaties during wars claiming the treaties would terminate the wars and what this ku klux clan hood and vatican head praises in his unsolicited preaches be with him and his bunch of celibates soon. Very soon and for their eternity!

Although I hate the word I use it here once. You do not need peace (or even peace security) as value. Our unlimited five values combined provide/guarantee for perfect peace. Peace treaties on paper in contrary imply (indicate – no need to read them) the opposite. Not one single core value comes unlimited out of any peace treaty. Try to find one and I am very quickly going to prove you wrong, trust me.

Accomplished peace (ladies & gentleman agreement) is smoked through pipes. However, perhaps, ladies, Cuban cigars are going to be accepted on Réunion too.

Ha ha ha he he he

So let us start our value check with your first day.

Day 1

purple rule

conscience check the rule, veto exception.

this means for our order and compliance concept,

in doubt you have to comply with your given order, of course!

Major Tom offered you honestly to leave us now again due to the army picture that you might have had before the day of your welcome meeting in the Bundeswehr (once Wehrmacht soon Befreiungsarmee), after he had explained the rule due diligently.

After you had the pleasure to enjoy his HIVs (at least model TT, compare following thoughts though) for six weeks and three home weeks to let them (th/s)ink you do have another picture of **us**, that means of **(y)our** regiment the

field (for **celibates**) **hunters regiment 2**

located in (Köln)Bonn and our forest barracks here in Hilden. You do also have another picture of **our**

(reservation of) **conscience**

(defending the) **fatherland**.

Eventually you also do have another picture, though, of current

civilized war forms (suicidal, genocidal, psychological ... warfare holocaust),

in general and in detail of current

civilized war enemy (including accurate enemy photos)

please be aware that I am going to offer you the same what the major offered after my few•• and our value check today.

You will be invited to think with us and help that we plan a decent coup for (the fatherland and) all of us (soldiers silver officers and maybe even golden officers (a few certainly)), honestly wishing you think about it due diligently within your period of decision.

Major Tom told you your different periods as basic service recruits, time contract and/or career recruits. Crossing these timelines means your positive decision even as subsequent reservists. Otherwise you leave us better before. Keep in mind you are our pilot platoons!

You are the first german recruits who we teach our adjusted conscience concept. You and we do not know yet how receptive our comrades elsewhere are for it.

We only know peter hits the nerve of his environment wherever he goes, sisters and brothers from the civil population(s) everywhere get into excitement with him (an exception was Koblenz obviously, location of the federal archive, obviously contaminated from soul lacking ghost like hell).

This is why we are quite sure our recruits Germany wide are going to agree with us. Regarding sergeants and officers we are not yet that optimistic, neither really pessimistic.

You are going to experience it yourself during your advance crash course in our TWTs. Our travel officers have booked the (civil) flight tickets to (south east) Asia already. You should have been in Istanbul when he invented the idea of Réunion walking along the golden horn bank over central station bridge view on illuminated Suleyman mosque back on the other side view on great Hagia Sophia and back again on Galata bridge view on Galata tower on your half left and amazing Bosphorus bridge half right. Turn more right and you look at big brother Asia how I would call their impressive tv tower on the Asian last west side its view clearly on nong Europe (resp. nong follow the thoughts, please). Lovely Istanbul expressed clearly its agreement all along his walk.

And it is not difficult to come close enough, although I was unlucky this time. When you meditated about Kafka's Heritage and six weeks Tom's crash course I spent my holidays in Pattaya, for a change, but did not hear and feel anything of him although he was there too (see @bridge).

I assume he did not find good pot. I tried and did not find any. Was even cheated twice and sold a too light brand called copy pot. Quite an el dorado of petty crime, this Pattaya.

By the way I do not want to allure you but I hope you smoked some joints when you read your homework. Then it does not feel like work, even if it is homework. We do not want drug addicts in our platoons full of heroine (GIs in Vietnam) or met-amphetamines (Wehrmacht in Russia - simple amphetamines to treat light ADHD symptoms which are holocaust conditioned though are accepted. You do not stay awake five days and nights in a row from them. You take them in the morning and afternoon do not forget to eat and sleep in the night. By the way, never forget to sleep enough! Noodles went to bed early for the past thirty years, was what he said once upon a time in America when he met his friend after this long period for the first time and was asked what he had done with his life. Go to bed early and spend your life with peter, is what Drake recommends!). We are endlessly tired of this fucking double moral. Cannabis is a nature gift, grows out of the soil that we defend and who of us likes to smoke it does so. If you do not know it, try. It does not trigger psychosis. Stupid evil lie. It is not addictive. It does not cause deliriums like fire water. It opens your minds. It widens your consciousness. That is why it is forbidden. It is a real danger for the enemy. Nothing more nothing less is the reason for its criminalisation. Hence to us not applicable. Had we cocaine leaves they were accepted too. However, do not take white cocaine powder, can be extremely dangerous.

Our sisters and brothers in the population around +/- 50 and younger as well as many elder, let us call them aunts and uncles (not all but most of them without cannabis frankly, however, they have experienced open minds), receive understand share and show him (more or less expressly) their support.

We have a case now. This is what we did not do for the past 25 years. So we are confident but do not know. That is what you need to know for your own decision. There is nothing more truth available.

Regarding the new situation with the first real case we do not mean the same now **acknowledged defence case** in which we were born after our parents and grandparents were already.

We refer to [Kafka's Heritage](#).

So after this short spontoan prologue our first value check.

Real event: Abolishment of compulsory military service

Check point: justice. Was it fair? No. My service was compulsory.

health. Was it healthy? For those exempt maybe. I still die from bullets and my air is more leaded now.

freedom. Increased? Freedom of (that means free from) young healthy recruit conscience concerns. Indeed.

truth. or lie? compulsory is our service now. Government could not enter into military coalitions with compulsory military basic service. Our general compulsory defence function which we accepted turned into an aggressive function compulsory on a parliament mandate basis what we do not, Mr. Röttgen! Hence lie.

พี่น้อง nil return no 5

I rather explain พี่น้อง here since we do not need five nil returns. One is actually sufficient.

พี่น้อง is our people belong(s) together value

It is a double word and means (feel for) siblings. For our purposes in the wider meaning people-togetherness (short: togetherness). The French called the same (quite limited) *fraternité* (their sister Jeanne déjà oublié, however, probably only an inaccurate use of language. Their sisters were probably included in their *fraternité*, what actually would have been easy to call *fratieté*. However, why not straight away *familieté*? Did they have a generation conflict too back then?). Literally พี่ (pi) means elder sibling. น้อง (nong) younger sibling. Nong Europe. Pi Asia. Together, pinong, it means *fraternité* including sisters. Smart language, isn't it!? Why, colonel, the word sibling means both genders too.

Sure but you do not know whether elder or younger sibling unless such a far distance between them like between pi Siddhartha (*about2563yago) and nong Jesus helps you, do you? They do not even have words for female pi or male nong.

The language differentiates the gender only between male and female in case of blood siblings (there are probably too many genders in Thailand that a try to differentiate in the language between them were useless anyway). Used only in conversation with thirds about their siblings. Never vis à vis. They address themselves as pi (or nong) plus given name. people siblings (everybody everywhere) are addressed likewise only without given name which you do not know. Like hey brother, hey sister in other countries too. However, also in these countries people do not refer to the age (maybe in some they do, I do not know every language).

But how do they know the age when they do not even know the name.

Either you see that your opposites are clearly younger or you just call them pi. Waiters, for example, are very often clearly younger and then called nong by the guests. Much elder people-siblings, by the way, are even called uncle or aunt. They have a beautiful melancholic song “drunken uncle” over twenty five years old and still everybody knows melody words and stars singing when you wish to hear it. Do you? Ok, let's go, It is the first song of the album here <https://www.youtube.com/watch?v=NwDMzXXRao&t=3367s>

Without understanding the words you hear that the singer is in care about his people-uncle who drinks fire water every day, didn't you?!

On this a Dujardin! You fucking german alcoholics establishment and choke from it! But do not allure our people to your misbehaviour while criminalising nature.

Back to pinong. Smart language which mirrors their original natural people belong(s) together feeling uncles and aunts (which are in grandparent age (!)) in cluded instead of in senior residence (occidental housing facility for old people, in which they can receive care and nursing). Not only them by the way. What major Tom teaches is news here. Fauna Flora and ancestors are very much included over there. In the own families as well as in the big people family who love po Sadet the 5th king of the current dynasty as if they would have lived already and known him alive before he passed away. They are certainly going to love po Bhumibol likewise forever. Generation conflict nearly unthinkable. Those both are their “holy fathers”, loved like own fathers who passed away already.

I only wonder why they accepted Francis invitation to preach such a nonsense like “give the gospels a Thai face” (quoted by Bangkok Post) in their country? Francis certainly invited himself, cannot imagine they did.

Waited probably decades for this generation change in Thailand: “eventually!!! Stubborn Bhumibol nipped off. His son is said to be quite a playboy. This is our chance in south east Asia’s knot point, go Francis!” is what Benedict XV(I) ordered Francis, not realising that they would not need a generation but dynasty change for this, hence disabled, unbelievable missionary frontal attack attempt.

n. b. international law: disabled nevertheless punishable!

Lunch time

Today exceptionally only one hour, soldiers, please be back here at 1 a. m.

.....

1 a. m.

Soldiers

What is our authorization fundament? (module 3)

„international war law combined with higher love, colonel.”

(after thinking about the answer for a second:) Excellent, soldier, I expected adjusted international war law combined with higher love as answer, however, in essential cases adjustments are the essential part of international war case law. Therefore, indeed, no need to mention in our TTs any more since we understand international law now.

- However, for time management reasons I would like to remind the upper Bundeswehr floors that Wehrmacht considers only external (terrestrial) conflicts as subject to international war law whereas Befreiungsarmee do not see any terrestrial (external) threats. Think about where you belong to in case of a split and who you want to take with you, babies, party or army soldiers!

I quote major Tom:

“Love is the higher law that provides for our competences.

That is why we would die in fulfilment of our duties if necessary.”

Which **mg** would? maybe shaking chancellor, Wehrmacht head command. However, I mean through bullets no weakness, so would peace time head command AKK or

still above her their company mother of seven? Or president Steinmeier who honourably sacrificed his kidney to save his wife, however, after sacrificing his children to the holy holocaust (his christolic presidency campaign)? Would he sacrifice himself to save the people? Which celibate would?

I quote major Tom:

“Norbert Röttgen, however, is no soldier. His job is not to defend the fatherland. He is not risking his life in fulfilment of his duties. He is the delegate who delegates this risk illegally to us.”

Illegally? Value check justice. We risk our life's we are the very near future head command this is fair, legally fair, in the meaning of our value justice.

Who doubts this may ask himself: is it unfair? (variation of what we (regiment 2) ask ourselves in cases of doubt: Is this fair?)

Do not think about laws and orders when you try to answer this question. You have one advantage.

absolut freedom

No valid legal provision existing at all.

all other german law is based on the fully illicit fundamental code.

international law was just explained.

We move in the law free paradise for lawmakers, among others war guidelines forth builders

Just ask your belly, isn't that really fair!

Or let it confirm carnival in summer for instance. That's fair, indeed! (Confirm check!)

Ha ha hi hi

Classic case law. We just needed a case. Now we have one.

peter is destiny's child, generals!

- Look at him now! <https://www.youtube.com/watch?v=qFJ3VKnwmJw>

I know some soldiers in here they want to stand up for him (and take care of his case).

You too admirals?

Destiny's present. Destiny's gift (the german word for poison), the celibates destiny's present gift! We are never getting such a case again.

People lawyers are case lawyers. Do not worry they are with us ...

... nothing new for anglo-americans. This is how (case) law develops, cases have either precedents (99.9%) or are them (0.1%, however, history is full with plenty of them), pretty law scientology (methodology (in order to assist peter a little, he seems too busy momentarily to add the outstanding annex to his crime time table)).

noc-concept (modules 4 and 5)

vs. **conventional (simple) order and comply (chain) hierarchy**

We begin with some slightly upper-floor-addressee adjusted major Tom quotes before I come to the different systems:

po (prosecutor office (illegal – superfluous - function)) **and judges** (on shine law base) **were/ police** (organic people protection function 1) are competent for the crimes committed during the frame aggression. We are competent for the protection against the frame aggressor the enemy of the civil population(s) of Germany, our fatherland (organic people protection function 2).

We are the protectors of the civil population against the enemy of our fathers and mothers brothers sisters and children, grandparents and grand-grandparents with or without bodies.

We discuss defending the fatherland within the discussion of conscience in every single position (on every single level) of our natural order concept which we are still analysing.

Generally we learn too that war enemies in general are governments. No states and no people but governments (sitting in Tokyo not Hiroshima).

Any government, including the own, can be enemy. It is the own government which claims head command. Isn't there a conscious and diligent conscience check the first duty of every military order receiver the first of which is comrade General Inspector Zorn?!

Generals and admirals please wake up! Please follow this contemplation and if it results in the recognition of the undoubtable (now acknowledged) defence case call in all

active troops first, conscience order **purple rule**.

Our platoons around Cologne (competent for the Düsseldorf people) and Travemünde (competent for Hamburg and Bremen) would immediately have a guilty conscience not interfering at home and therefore the duty to do so. **Immediate natural conscience order**. No infringement concerns.

However, whatever you admirals and generals (with command over abroad troops) decide, stay or come back and grant your troops a (real true and honest) hero's welcome, I mean this without any evaluation – it is your personal conscience decision –, cannot change our natural conscience order in our dimensions of the natural order compliance concept (**noc-concept** (purple rule and **purple concept**), need no (n.)oc-decree (in green), do we!?!)) which is for the home troops to intervene without unreasonable hesitation, i.e. without ignoring very reasonable help calls from the middle of the people any longer only because the enemy/ies pretend/s unawareness of them ...

With respect to your personal conscience decision, two • • (remark and reminder):

remark (in anticipation of module 6) average soldier age 19, na na na nine nineteen ... (none none of them (recruits!!!) receiving the hero's welcome ... (my dear admi- and generals) **isn't this unfair!**) of completely unnecessary international battle wars (in the classic vicious circle).

Reasonable help calls from the middle of the people are not only to find in the register help calls in Kafka's Heritage (listen to more music with our American comrades, generals and admirals in New York Miami and LA, **pink** for example – what about us or earlier already dear Mr. president (she addressed established oil mafioso Bush jr. (!), Mr. Trump, who wasn't permanently peed on for alleged tax evasion or other stupid lies). Now she hopes on you, Mr. Trump (favouring a decent joint over whiskey and cocaine) and your generals and admirals! I am sure you do not disappoint us! (Every) **reader watch now** <https://www.youtube.com/watch?v=1f8S5u01E0Y>

and **now** (not always peters (analytical) testimony only)

<https://www.youtube.com/watch?v=wKOEJs602uk>).

remind our recent history. Admiral Canaris (ambivalent – did not really risk his life. Lost it nevertheless.) and colonel Graf von Stauffenberg (resistant silver star). Wouldn't you wish **operation Valkyrie** had been successful? It was not because first too late and second Stauffenberg was quite alone.

(dis)mission (from) "sette colline" (as synonym for mother earth) will be successful.

participate who feels **พี่น้อง** here!

noc-concept vs. conventional (simple) order and comply (chain) hierarchy

Conventional order and comply hierarchies are not only simple they insult natural intelligence. Bundeswehr explains them the recruits as follows:

Do not comply with a direct order which violates your conscience. Examples of soldier orders (at the end of their order chain) are given, simple as major Toms welcome example, and political questions not touched. If asked back though what if the whole operation order which is only indirect for soldiers violates the conscience it is admitted that it is only indirect but that it has a direct addressee on higher more experienced and accordingly responsible level who has to countercheck with his conscience too of course, so do not worry, recruits, you would be quite unlucky if this trap case crossed your way. You can believe now or quit now again (until 2011: you can believe now, since you did not refuse (general conscience decision) your service (in theory such a refuse is possible later too, the psychological threshold much higher though as well as the procedure much more difficult)).

How ever our **purple rule** within the **purple concept** regarding direct orders works similar (they are kindly followed (in doubt)).

Due to its natural transparence (pure open door policy), however, which bases on our core value **truth** also indirect orders aren't going to be surprising. They are accepted in full accordance with all indirect addresses after previous discussions in our HIVs (here also used in the meaning of platoon – every commander (untechnical) has at least two own platoons. One as head one as soldier. Stauffenberg was platoon head as colonel but still only silver soldier in his general stuff).

Very good, soldiers, so far! We make a 10 minute fresh air break. (Enough time for a spliff, if you like, it gives you wings for the two hour finish today. I brought some, you find them on the table next to the doors. Otherwise drink a coffee or red bull (however, a 13m \$ lawsuit proved it doesn't gives you wings. Probably right, at least no eagle wings (inspiration) like weed))

Please be back at 3.15 p. m. ...

...

...

3.15 p. m.

soldiers

let us sail through the last two hours on our white head sea eagle wings circle and surround the prey(ers) further in order to take position for our hunt nosesdives tomorrow at sun rise!

Before the break we explained demographic oriented natural order chain reaction optimization implemented by and in our **purple concept** (recruit/soldier sergeant silver).

Only to avoid here (representative of in general) any misunderstanding. Trois couleurs verde bleu lilas are value indicators starting from head to down from green to purple plus yet blank space ...)

recruits do not start their army engagement as commander (untechnical) but are never ever again regarded treated and used as human warrior resource.

The youngest are our most fundamental relation into and out of the population, our head, the represents of our peoples brain not its muscles, central intelligence.

General field commanders go ahead. Hannibal G J Caesar (last honourable roman) Napoleon did as well as commanding admirals do, who were great sailors, Radnar Lodbrok Magellan admiral Nelson, left their sinking vessels last.

Stauffenberg like, remind the gap, Bundeswehr admirals!

More than ever regarding our sneaking demographic population development (sneaks can move quick). Elder become slowly more, younger slowly less. Too less, however quickly, when suddenly the first carrying walls break and at least a few floors of the card house implode.

Classic kind dying, no unknown phenomenon. How ever, man kind is not directly concerned (women kind is (attackers are celibates)).

Prof. Lesch, Munich, probably explained especially this bio socio logical phenomenon in some more detail when he reported ignorance of men abolishing mankind and requested an immediate restructuring of civilization (probably occidental – I could only read the book cover text).

Wehrmacht principles children (to the weapons) turn into **Befreiungsarmee** principals (in power!)

So much to our **noc-concept** vs. conventional (simple) order and comply (chain) hierarchy.

Our last•• today (Kafka instructions and module 6) are

- **read!**
- **combat plan**

Admi- and generals, (so) to *spea*k is *silver*, to keep silent gold,
as for us.

so to *wri*te is *silver* (la base, nous trois couleur complied, read all uncountable times already), **SO**
read! gold, how ever
as for you.

You read the case.

International law combined with higher love are our authorization fundaments.

Kafka's Heritage is our case.

You have combined administrative judicative and executive powers in your individual natural noc-position what you have to regard when you make your personal conscience decision.

Make your decision on the basis of your **knowledge** not your beliefs. A case decision presumes knowledge of the case facts and of its decision fundament. We move on international law combined with higher love. We decide on it too. Read Kafka's Heritage is **emerald** (green (gold)) miracles in there **sapphire blue**, trust us, listen (to catholic preaches) and believe according political narrations of Inspector Zorn is real (no copy) dark (magic) **metal** (not even gold-costume covered, but **black whole** dark).

And **then decide without death fear**.

For your convenience some additional and some KH quotes from major Toms annex:

additional (technical): §§ 6, 7 VStGB (in our international law modules often mentioned. Read them not only once (good (not bad) judges use to read quoted legal provisions every individual time to understand the individual quote context thoroughly) Do not speed reading! Read follow the thoughts understand (or send us your queries). Quotes in our bridge time are quite often links. They lead to different texts but can lead to many further different internet contents. Quotes are not only made for formal but substantive evidence. [Klick on the links!](#) ... and soak up the contents. Pay attention to the acoustic ones, listen to texts (means understand them read offered lyrics). See illustrations. More than ever of the enemy. Look at every offered picture in KH on your search for the enemy, be it two (the father or the son?) or 84 pictures (rest in peace - help here: in both files together are three enemies hidden to scent, smell, surround and identify clearly)!

additional (content):

„Das Amt“: literal full pages quotes in phenomenons (file name phänomene) prove well now wellawareness of international law in history and presence of the qualified ghost wars which go on for eternities being terminated by us. (an international historian commission even reported their time witness interviews conducted between 2006 and 2010, among them with Joseph Goebbels, in their accurate sources list).

So now, not “please” weak up and “please” follow this contemplation.... Now it reads: Generals and admirals wake up and [follow major Toms noc-instructions!](#) conscience order [purple rule](#). he even presents a thinkable resolution. But keep in mind too, this is no novel this is war here [purple rule](#) applied in wrong compliance and noncompliance cases. By our new fresh judges in doubt, rather than a military tribunal, star colour irrelevant, colleagues!

Eventually one rather minor addition to the initial move of (y)our reasonable combat plan needs to be mentioned. You oversaw temporary constitution organ federal comedy assembly although 90 per cent of them are going to get arrested due to similar permanent functions.

However, after simple mind times have begun what needs to be demonstrated. Two honest and true humoristic confessions of their real blindness after a three months think tank in Sweden are certainly more than fair enough for the phenomenon of general simple celebrity.

I did only find represents of the official celebrities fraction on the federal website who

smiled for Steinmeier (celebrity in earlier election assemblies obviously facade only, no listed members).

So sister Carolin (Kebekus – german comedian) and brother Hape (Kerkeling – german comedian) are served these bitter sweat apples.

General simple celebrity done. Individual ignorant celebrities (from the comedian fraction too) are not, Mr. Yanar. You better apologize before you are asked again to improve your prospects before brand new courts.

Last constitutional organ collected.

Now yellow can relax already before the finish tomorrow morning (do not hold it for (black-red)-gold! Jewish souls are yellow), however, we want green(span) happy too and to defend our green head start tomorrow on avenue réunion (champs élysées direction love deep indian ocean). How deep is our love comrades soldiers sergeants and silver officers?

chorus: Let's go colonel, let's go lets go let's go !!! !!! !!! !!

For this purpose I have already two individual peace prices for you in my pockets. First one to be earned by comrade Jack. Jack Nicholson. Comrade Jack we accord to your request to be given the purple order of not escorting, of arresting war gamer Armin!

Spontoon applause ...

And we could imagine comrade Caro and her squad would like to accept the first governmental order to be followed straight away on Dec 27 to find Carmen and her daughter Joana and to escort both of them into our safe custody first.

... standing ovations

and excited cc: "Indeed I would! At command, colonel!"

You see, real sugars(!) for you soldiers

and for you kids of our fatherlands perfect whips (against celibate Ruprecht and the real philistines), aren't they!

The story of sugar and whip!

See you fresh and well-rested tomorrow morning, soldiers!

Table knocking and applause ... end of episode
